

about tirupur, india

We chose Tiruppur in India for KNIT-TECH because it is the Knitting Capital of India, and the biggest region for textile manufacture.

Knitted garment exports from the region is around \$5 billion annually and growing still with an equally enviable domestic market.

Tiruppur's entrepreneurs and its work force is held in high regards for their skill sets, emphasis on technology, assimilating modern processes and their capacity to assume risks.

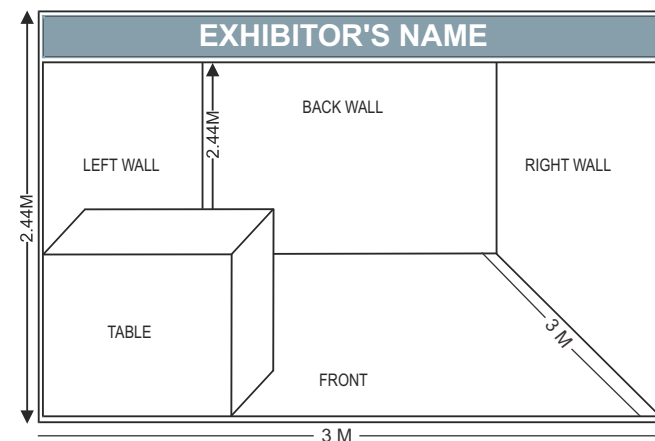

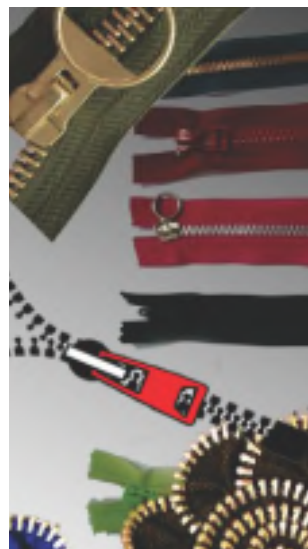

Tiruppur offers top-class connectivity to the rest of the world – an International Airport, Rail Connectivity, Internal Container Depot for Sea-bound business, world-class telecommunication and a robust work force that is quick to learn and implement technologies to practical uses.

Based on the area of the Stalls, they have been categorized as A, B, C, D, E, F, G. The rents vary as per the size. Stall tariff gives a broad outline of the charges.

The construction of the stall would be of strong rigid Aluminium Octonam panels, three sides would be covered using strong, thick Laminated Panels.

The Flooring would be thick quality Synthetic Carpet. Height of the stall would be 8 feet / 2.44 mtrs. & would include THREE SPOT LIGHTS, 5 AMPS PLUG POINT, ONE TABLE AND TWO CHAIRS and name of the participants on the panel.

Standard 9 Square Meter Stall (3mtr x 3mtr)

hi-tech international

Hi-tech International Trade Fair India Pvt. Ltd is a pioneer globally acclaimed industrial trade fair management and organizing company that focuses on the textile industry in India.

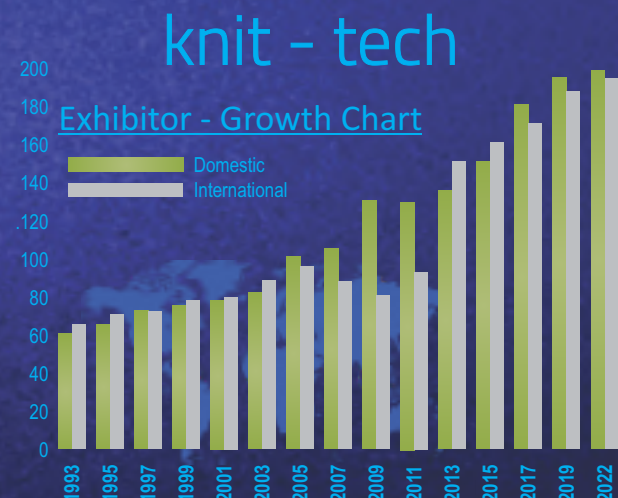

Hi-tech International is particularly recognized for its KNIT-TECH series of textile exhibitions in Tiruppur, India. KNIT-TECH is an ITPO recognized exhibition that adheres to global standards for trade fairs.

Exhibition Area

Area Covered in Sq. Mtrs.

KNIT-TECH is a biennial knitting technology trade fair and has so far completed 16 editions with the 17th edition scheduled for 2024. Incidentally the 15th edition coincides with our Silver Jubilee celebration. It has been a long but pleasant journey for us, during which time our efforts to connect global

manufacturers of textile machinery with apparel producers in Tiruppur, India and the Asian region was a big success.

KNIT-TECH is a world leader in showcasing knitting technologies covering the full range from yarn manufacture to the final knitted apparel and finished garment.

the textile industry in india

India with a population exceeding 1.25 billion is home to a huge domestic market for textile and clothing, and more significantly it is also a high-volume exporter of knitted fabrics, apparel and clothing.

Significantly, India is a traditional producer of cotton in big volumes – the basic raw material that is so essential for the knitting industry of India and more particularly Tiruppur – the knitting capital of India.

Currently India's share in global textile trade is 7.0 % (Ministry of Textiles - GoI) and is growing at a fantastic speed thus offering textile equipment manufacturers from around the world a fabulous market for their products running into several billion dollars.

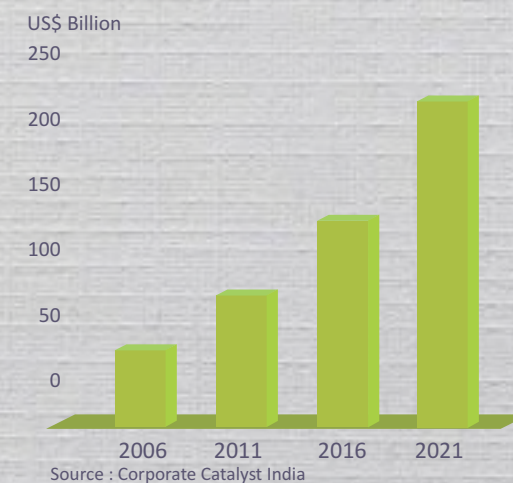

It is an opportunity that textile machinery manufacturers from around the world will want

to corner and help them to establish a place in India.

India's quest to become the world's No.1 textile garment and apparel manufacturer is fully supported by Indian Government programs and schemes at national level and the state governments at regional level. Support programs include fiscal incentives, industry-friendly textile policy, creation of specialized textile parks and research centres.

The emphasis is on modernizing and adopting the latest technologies that improve quality and increase productivity. Value addition is a high-priority area for the Indian Textile Industry.

India's Textile Industry Market Size

the knit-tech advantage

KNIT-TECH is our flagship industrial textile fair for the Knitting Industry in India. Our 16 editions over a period of 25 years have helped domestic and international textile equipment manufacturers to connect with the Indian Textile Industry and cement a lasting relationship in which both vendors and buyers benefit enormously.

Uniquely KNIT-TECH is the biggest ever trade fair exclusively for the knitting industry in the Asian Region. The advantage is that when you participate in KNIT-TECH you will be in the midst of Tiruppur that produces nearly 90% of India's knitted garment and apparel, thus making post-exhibition follow-up and concluding deals easier.

Domestic Visitors

Our visitor profile is among the most enviable and includes visitors from India, Bangladesh, Vietnam, Singapore, Malaysia, Sri Lanka, Maldives, Myanmar and executives from the Tiruppur knitting industries. On an average each edition of KNIT-TECH attracts 50,000+ visitors over a period of 4 days, resulting in business enquires valued at more than \$500 million at the venue itself.

exhibitors

Knitting	: CircularKnitting, Flat Knitting , Open Width Knitting, Seamless Knitting , Warp Knitting Machines
Dyeing	: HTHP, Softflow, Airflow, Atmospheric Dyeing Machines, Boilers, Garment Washing / Dyeing , Balloon Padding, Colour matching Cabinets, Kitchens, Lab Testing Equipments, Yarn Dyeing Machines
Compacting	: Open Width Compactor, Regular, Stenter, Relax Dryer
